SUMMARY

Data Science and Machine Learning professional with a strong foundation in Python, SQL, and predictive analytics. Experienced in building end-to-end ML pipelines and computer vision solutions using YOLOv8, along with data preprocessing, EDA, and model development using Scikit-learn. Developed cloud-integrated data pipelines using AWS, MySQL, and Streamlit for real-time analytics applications. Former Assistant Professor with strong analytical thinking, problem-solving, and communication skills.

PROJECTS

Urban Bot – Smart City Analytics 12/2025 - 02/2026
Chennai, India
Smart City Analytics platform utilizing computer vision and AWS technologies

- Developed an AI-based smart city monitoring system to analyze traffic, accidents, road damage, and air quality
- Implemented YOLOv8 computer vision models to detect accidents and road anomalies from video data
- Designed an ETL pipeline to process event data and store structured records in MySQL database
- Developed an interactive Streamlit dashboard for real-time monitoring, backed by a MySQL database on AWS RDS for remote data persistence

Multiple Disease Prediction using Machine Learning 11/2025 - 12/2025
Chennai, India
Machine learning project addressing health prediction

- Built a machine learning classification system to predict multiple diseases based on patient health parameters
- Performed data preprocessing including handling missing values, feature selection, and normalization
- Trained classification models using Scikit-learn and evaluated performance using accuracy and confusion matrix
- Developed a user interface using Streamlit for real-time prediction input
- Improved understanding of model overfitting, feature importance, and model evaluation techniques

EXPERIENCE

Assistant Professor – ECE 08/2012 - 05/2019
Tagore Engineering College Chennai, India

- Analyzed complex datasets using MATLAB to perform signal interpretation and system performance evaluation.
- Led technical workshops on analytical problem-solving, improving student competency in quantitative reasoning.
- Authored technical documentation and research reports, translating abstract engineering concepts into actionable insights.

INTERESTS

Learning New Technologies
Enthusiast in learning new technologies and improving problem-solving skills

Technical Content Reading
Enjoys reading technical content and staying updated with industry trends

KEY ACHIEVEMENTS

☆ **Project Achievements**
Developed an AI-based smart city analytics platform and a multiple disease prediction system, showcasing extensive knowledge in data analysis, machine learning, and deployment

SKILLS

SQL · Python · Microsoft Power BI ·
GitHub · EDA · Pandas · NumPy ·
Machine Learning · Matplotlib ·
scikit-learn · Streamlit · AWS EC2 ·
AWS RDS · ETL

EDUCATION

M.E - Communication Systems
Anna University, Chennai, India
08/2010 - 05/2012

B.E - ECE
Anna University, Chennai, India
08/2006 - 05/2010

LANGUAGES

English Proficient

Tamil Native

Malayalam Conversational

CERTIFICATIONS

Advanced Data Science Program
GUVI Geek Networks (IIT-M Pravartak) - 2026

Introduction to Data Engineering & Big Data
GUVI - 2026

Web Scrapping
GUVI - 2025

Data Analytics using Pandas
GUVI - 2026
